EXPERIMENT 8

Title: Food Delivery Mobile App Storyboard

AIM:

The aim is to design storyboards representing the user flow for a **Food Delivery mobile application** using Balsamiq.

PROCEDURE:

1. Tool Used: Balsamiq Wireframes
2. Created a new project with mobile screen layouts.
3. Designed screens showing the food ordering process.
4. Used UI elements like buttons, menus, images, and icons.
5. Focused on simple and user-friendly design.

USER FLOW:

1. Home Screen
2. Restaurant List Screen
3. Menu Screen
4. Cart Screen
5. Checkout Screen
6. Order Confirmation Screen

1. **Home Screen**

Components:

- Search bar (search food/restaurants)
- Banner for offers
- Categories (Pizza, Burgers, Drinks, etc.)
- Popular restaurants list

Purpose:

Starting point where users explore food options.

2. **Restaurant List Screen**

Components:

- List of restaurants
- Ratings and delivery time
- Filter & sort options

Purpose:
Helps users choose a restaurant.

3. Menu Screen
Components:
- Food items list with images
- Price and description
- “Add to Cart” button

Purpose:
Allows users to select food items.

4. Cart Screen
Components:
- Selected items list
- Quantity controls (+ / -)
- Total price
- “Proceed to Checkout” button

Purpose:
Review selected items before ordering.

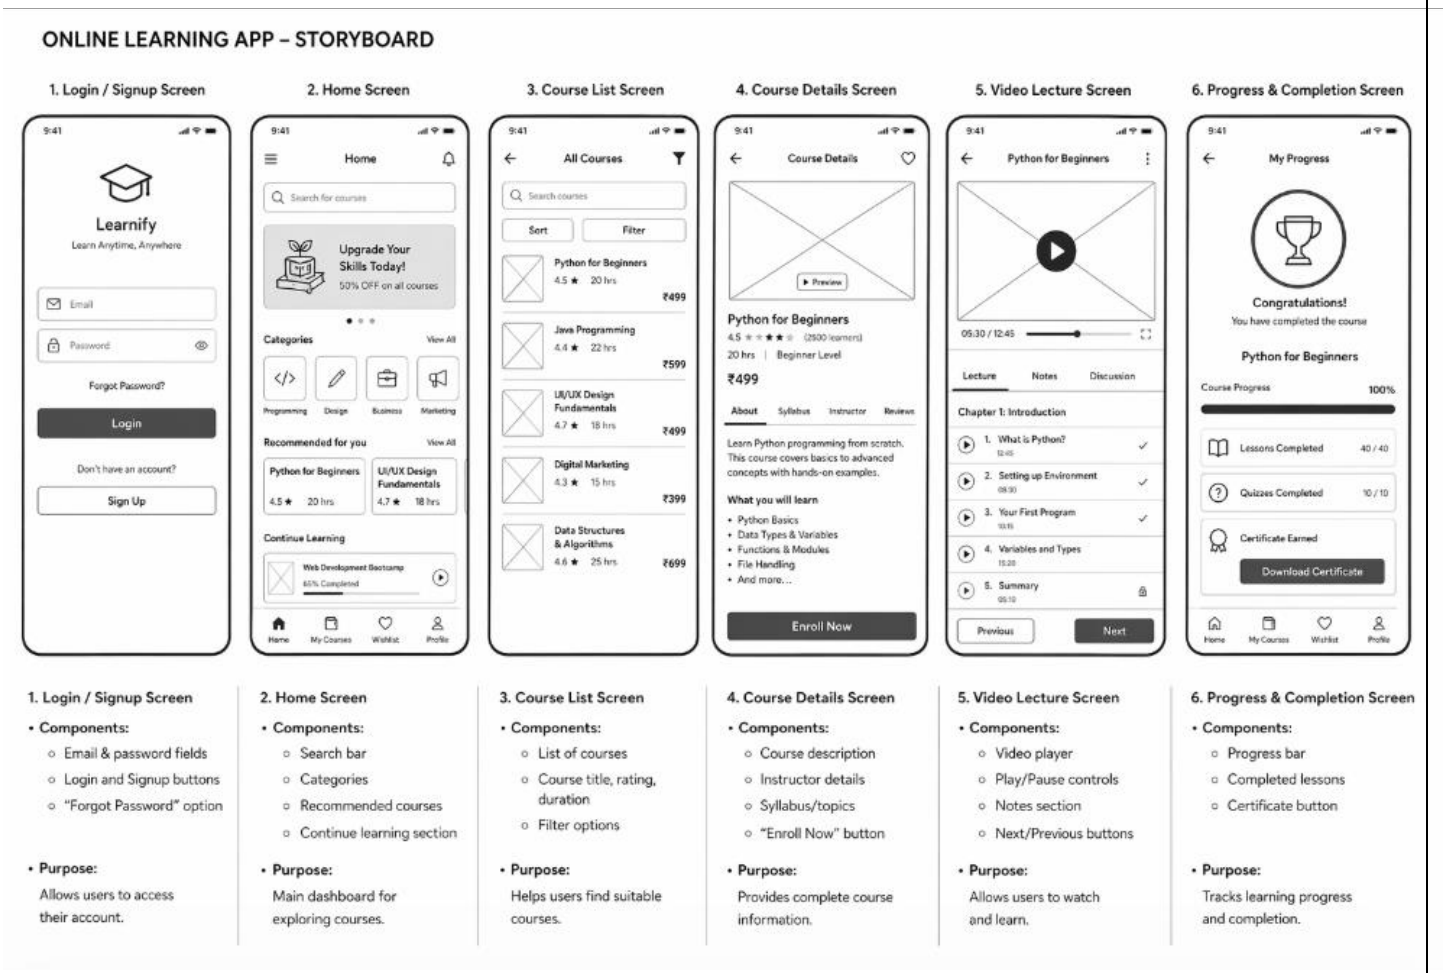
5. Checkout Screen
Components:
- Delivery address input
- Payment options (UPI, Card, COD)
- Order summary
- “Place Order” button

Purpose:
Complete order details and payment.

6. Order Confirmation Screen
Components:
- Success message (Order placed!)
- Order tracking option
- Estimated delivery time

Purpose:
Confirms successful order placement.

Images:



RESULT:

The storyboard for the Food Delivery app was successfully designed, showing a clear and smooth user flow from browsing food to placing an order.
